

USER MANUAL MOMENTS COLLECTION

THANK YOU FOR HAVING SELECTED AN IMAGILIGHTS® MOMENTS® LAMP.

Carefully read this guide before using your lamp. Always use your lamp in conformity with the utilization precautions. Failure to do so will void any warranty. IMAGILIGHTS® disclaims any responsibility for incorrect use of the product or charger in combination with another product which could be defective, dangerous or inappropriate.

TECHNICAL INFORMATION

Light source	LED 24 - mini USB
Number of Leds	24
Led lifetime	+50.000 hours
Battery type	rechargeable Li-ion 3.7 V 18650 battery
Battery power	5200 mAh
Energy consumption	1.5 Watt
Remote	Infrared

MATERIAL

Metal: Anodized brushed aluminum

Plastics: PMMA + PC

FIRST USAGE PRECAUTIONS

To guarantee the maximum autonomy of your product, please conform to the first usage precautions:

- 1) Connect the charger
- 2) Fully charge your lamp's battery by placing the lamp on the charger for at least 8 hours. While the lamp is charging the light indicator on the charger will appear red. A green luminous indicator indicates the lamp is fully charged.

It is recommended to empty (discharge) the full capacity of the battery before recharging fully. The internal battery has a charge accumulator and will require 5 or 6 complete charges/discharges before reaching optimal charge capacity.

Your lamp automatically turns off when placed on its charger plate. This to protect the long life of the battery and to assure that charging and discharging is not done simultaneously.

Frequently re-tighten the lamp head by turning it firmer on the lamp base.

The flexible external cable of this charger cannot be replaced.
In case of damage the charger should be discarded.

LIGHT HOURS (APPROXIMATELY)

Charging time: 8 hours
High intensity in warm white: 18 hours
Low intensity in warm white: 76 hours

Color mix: 26 hours
Color fix: 34 hours
Candle effect: 34 hours

- 5% - 33%
- 0% - 5%

Press color up for + 2sec. to switch your lamp ON or OFF

- ↑ COLOR UP: Choose between one of our 24 pre-programmed colors.
- ↓ COLOR DOWN: Choose between one of our 24 pre-programmed colors.
- Start the 160.000 color mix mode 1 which will take approximately 14 minutes (= ultra slow), and will continue without interruption. To fix a color, press the same button again. To continue the cycle, press this same button again.
- Shift through 4 different light intensity modes.

INFRARED REMOTE CONTROL

COLOR UP & DOWN: Choose between one of our 24 pre-programmed colors.

Start the 160.000 color mix mode 1 or 2 which will take approximately 14 minutes (= ultra slow), and will continue without interruption. To fix a color, press the same button again. To continue the cycle, press this same button again.

BRIGHTNESS: Shift through 4 different light intensity modes.

CANDLE MODE: Choose candle light mode 1 (yellow) or 2 (orange).

COLOR LOCK: Press this button multiple times while aiming at your lamps to disable the pushbuttons functions on the bottom of the lamps. To cancel the color lock function turn off your lamp with the remote or place it back on the charger.

The remote operates on one Lithium battery CR2025 3V

CHARGING POSSIBILITIES

The MOM 1 MINI CHARGER charges one single lamp and operates with the following adapter:
Input 100-240V AC~50/60 Hz - Output DC 6V 1A

One MOM 8 multi charger plate charges up to 8 lamps simultaneously. These can be stacked on top of each other. The MOM 8 MULTI CHARGER operates with the following adapter: Input 100-240V AC~50/60 Hz - Output DC 9V 5A

Your lamp automatically turns off when placed on its charger plate. This to protect the long life of the battery and to assure that charging and discharging is not done simultaneously. While the lamp is charging the indicator on the charger will appear red. A green luminous indicator indicates the lamp is fully charged.

Charger plates are not standard included when purchasing a table lamp
Lamp is useless without its specific prescribed IMAGILIGHTS® charger.

REPLACING SPARE PARTS

Every part of the MOMENTS lamp can be replaced when necessary. Please contact us at info@imagilight.com for more information.

To open the lamp first carefully turn the lamp's head off the lamp base. Remove the metal lamp base by pressing on the LED stick with your thumb while holding the metal lamp base.

CAUTION: Place your hand under the lamp base when dismantling the lamp. Failure to do so may result in the inside LED module to drop.

fase 1: turn off the lamp's head

fase 2: remove the metal lamp base

fase 3: loosen the screw of the battery door

fase 4: remove the battery door

fase 5: remove the battery
Push the battery down before pulling it out.
Attention: The device must be switched off before removing the battery.

TROUBLESHOOTING

If your lamp falls and the top part of the head unclicks:

Firstly unscrew the opal diffusor from the lamp base before clicking the head back on. This to avoid damaging the USB led stick.
